

~~SECRET~~

Notes on Project 36.2377

Foreward, 3. ll.up

Delete word, valuable. Let's not sing our own praises. See suggested change in text.

P. 1, Note

Isn't this definition somewhat over-technical? Moreover, it does not really tell what semi-conductors do? e.g., the functions noted on p. 5, first full para.

P. 6, ll. 4-5 up

Insert plant name from p. 31.

P. 8, l. 5 of text and Fig. 1.

The time lag shown in Fig. 1 appears to be more than 2 years.

P. 17, middle para., 3d line

Meaning unclear. Should comma be deleted as suggested in text?

Same para., l. 6

See text.

Ditto, l. 7

Change to present tense.

P. 18, top para.

See text.

Pp. 18-19

Supply verb.

P. 23, ll. 19-21

See text.

P. 30, Note

Repeated on p. 32.

~~SECRET~~

SECRET

Notes on Project 36.2377 (continued)

P. 31, 1st para., ll. 9-13

Suggest treating in a little more detail the function and nature of the junction dot together with the manner of assembly.

P. 36, Note 46

Sequence of documentation appears to be fouled up. Document cited in Note 46 does not seem to refer to statement in text. Better recheck documentation which precedes and follows.
